Fenstermann offers a bottom up top down pleated blind or honeycomb shade with only 1 inch in overall depth. This shade is suitable to install as inside mount to a shallow depth of only ½ inch and is perfect for windows with a window trim that you don't want to cover. These shades are also the only inside mount option for European style tilt and turn window. And all available in hundreds of fabrics, prints and colors. www.fenstermann.com We treat your home as it was our own. Meaning that we put ourselves in your shoes and walk your home and suggest whether you need some shades or whether you might not need some shades in the room or home. www.fenstermann.ca Our pleated blinds and honeycomb shades have a long history in Germany and Europe and have improved over the years like a Mercedes S Class did. It was already perfect but at the end there were still some fine adjustment that made the car better. It is the same with our shades. Though the US and Canadian window and door market is quite different than the European market and therefore we helped the manufacturer develop new installation options for American windows and doors – up to drill free options for tilt and turn window or folding doors. All of this is backed by our 5-year manufacturer warranty.
