I have been selling property in the North Portland (and all over the Portland area) for the past 21 years. I enjoy both buyers and sellers, although I end up being a buyers agent much of the time. I told a friend last week I enjoy my work so much, I will be working in real estate until I can't make it up the stairs to show a property. We offer the most competitive tools and resources for buying and selling homes in the market, and our realtors are dedicated to providing the service you need to make the process as quick and easy as we believe it should be. Our robust search tools are at your disposal to find the perfect home for you and your family, and our agents are ready and eager to help. We promise that when you use our websites, the perfect home is just a click away. If you have any real estate needs including buying, selling, advice on market conditions or just to get the valuation on your home, please contact me. I work for Meadows Group Inc., Realtors. Looking forward to our conversation.
