I am an MFT; Marriage, Family Therapist of over 29 years. I am a counselor. My practice is presently servicing all of Los Angeles and I am located in West Los Angeles. If you need expertise, I am here for you. Some problems are specifically gay; others just come up while living life. I have the wisdom and clinical experience to understand what it means to be gay at ages twenty, thirty, forty, fifty and sixty. I have been there myself and lived through it. Whether your problem is long standing or new I am here to assist you through all of it. I use hypnotherapy with counseling because it makes counseling move along much faster. Just remember one thing: You are special. There is no other person on earth that is you, so it is important that you bring out the best in yourself. Expert counseling will and can do that for you.

Specialization(s): anxiety, depression, shame issues, couples
