Medical care for gender transition is provided by our Gender Services team in friendly neighborhood clinic settings, including access to primary care, as well as specialty services within our well-respected multi-specialty clinics. We provide hormone therapy, some surgical therapy, and general preventive health care. All our providers are open to new gender patients in Gender Services, and to caring for LGBTQ patients in their other practices: family medicine, internal medicine, and obstetrics/gynecology. I provide hormone therapy and primary care services for all LGBTQ and gender non-conforming patients, including PrEP and sexual health. I enjoy primary care because of the long lasting relationships that it fosters! Dr. Hamp sees patients in Gender Services in Minneapolis and Internal Medicine in St Louis Park.
