Medical care for gender transition and maintenance is provided by our Gender Services team in friendly neighborhood clinic settings, including access to primary care, as well as specialty services within our well-respected multi-specialty clinics. We provide hormone therapy, some surgical therapy, and general preventive health care. All our providers are open to new gender patients in Gender Services, and to caring for LGBTQ patients in their other practices: family medicine, internal medicine, and obstetrics/gynecology. As a Family Medicine clinician, I also provide primary care to patients through various stages of life. Because each patient comes from unique circumstances, I believe it is important to take time to listen and to create a safe environment for patients to ask questions. I value building lasting relationships so we can work together to maintain wellness, prevent illnesses, and/or manage chronic diseases. Amelia Vang, PA-C sees patients in Gender Services and in Family Medicine in Minneapolis.
