Medical care for gender transition is provided by our Gender Services team in friendly neighborhood clinic settings, including access to primary care, as well as specialty services within our well-respected multi-specialty clinics. We provide hormone therapy, some surgical therapy, and general preventive health care. All our providers are open to new gender patients in Gender Services, and to caring for LGBTQ patients in their other practices: family medicine, internal medicine, and obstetrics/gynecology. As a primary care physician, I enjoy being able to provide care for all patients, including LGBTQ and gender diverse patients. I look forward to developing a strong, lasting relationship with each of my patients and encourage patients to take an active role in their health care decisions. Dr. Schober sees all of her patients in Maple Grove.
